

Easy Flux

AIR JET SYSTEM

DEVICE FOR A/C COMPONENTS CLEANING

SAFE CLEANING

Wheeled device for A/C automotive components flushing

EASYFLUX is an easy system for flushing and cleaning of vehicles A/C components, in particular the radiators. It works exclusively with **compressed air**, without the need of electricity. The device uses a **special washing fluid**, which is pushed inside the components to clean, together with **10-micron filtering system** to guarantee the best result. Compact and lightweight, EasyFlux is **very easy to transport**.
