

A/C CHARGING STATION

## KEYWORD: PORTABILITY

*The most compact A/C charging station for R134a of the Itech range*

With an **extraordinarily-compact size** of only 500x440x800 mm, **NANO 2.0**, first important update of the historical Nano, provides a full-range charging capability for **R134a** vehicles, representing the best solution for anyone looking for an easily-transportable system. Not by chance, among our many stations, Nano is the one preferred for agricultural vehicles.

The most important upgrade of Nano 2.0 is the larger gas tank (7 l); moreover, it is now possible to request — as **optional** — the printer and/or the warming belt.

Equipped with internal vehicle **database**.
