

# WHISPER

LOCKER FOR COMPRESSOR SOUNDPROOFING

## SILENT LIKE A BLOW

*The customizable cabinet for compressor soundproofing*

WHISPER is a cabinet internally lined with **sound-absorbing material**, designed with the specific purpose of reducing as much as possible the noise produced by compressors and similar machines. Available in three different formats (24 liters, 50 liters and 90 liters), it is normally supplied in an elegant cream white color, but for significant orders it can be **customized**. It is equipped with an **internal integrated ventilation system**, controlled by a **temperature sensor**. The 90-liter version is available with 230 V or 400 V power. Currently, the product is mainly use in the dental, medical and healthcare sector, where the need to maintain particularly quiet environments is perfectly matched with the excellent soundproofing capabilities of Whisper.
